Deoria, Uttar Pradesh, India | (+91) 83036-74267 | princeyad589@gmail.com
linkedin.com/in/prince-kumar-yadav | github.com/codeyourcareer | LeetCode: 80+ Problems Solved

SUMMARY

Final-year Computer Science Engineering student with strong Java and Spring Boot backend skills. Built REST APIs for a full-stack Job Portal and gained real-world software experience at Bharat Electronics Limited (BEL), a Government of India defense PSU. Certified in Java (HackerRank) and solved 80+ problems on LeetCode. Eager to contribute as an entry-level Software Engineer or Java Backend Developer.

TECHNICAL SKILLS

Languages:	Java, PHP, JavaScript
Frameworks & APIs:	Spring Boot, Spring Security, Hibernate/JPA, REST APIs
Security:	JWT Authentication (in progress), Role-Based Access Control (RBAC)
Databases:	MySQL (Schema Design, Query Optimization, Indexing)
Web Technologies:	HTML5, CSS3, Bootstrap
Cloud & Tools:	AWS (EC2, S3, IAM), Git, GitHub, Maven, Postman, Linux, IntelliJ IDEA, VS Code
Core CS:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, SDLC

EXPERIENCE

Software Engineering Intern Aug 2025 – Sep 2025
Bharat Electronics Limited (BEL), Ghaziabad (Defense PSU — Ministry of India)

- Engineered a Python-based Monopulse Equation and GUI Generator for IFF radar systems, **reducing manual calculation effort by 40%** across engineering workflows.
- Validated algorithm outputs against real-world radar benchmarks, achieving **98%+ accuracy** in signal parameter matching.
- Followed defense-grade secure coding standards and software documentation practices throughout the full development lifecycle.

PROJECTS

Job Portal — Hiring Platform Backend *Java, Spring Boot, Spring Security, JWT, MySQL, REST API, Maven* [[GitHub](#)]

- Built a multi-role REST API backend supporting **Job Seekers, Employers, and Admins** with user registration, login, and role-based access control using Spring Security.
- Developed complete Job CRUD APIs (create, update, delete, search by keyword/location) and User management APIs tested end-to-end using Postman.
- Designed normalized MySQL schema for Users and Jobs with optimized indexed queries for high-read workloads; integrated Spring Data JPA / Hibernate for ORM.
- Currently implementing **JWT-based stateless authentication** with Spring Security and planning AWS deployment (EC2 + Railway) upon completion.

Doctor–Patient Telemedicine Platform *PHP, MySQL, JavaScript, Bootstrap* [[GitHub](#)]

- Developed backend appointment booking with role-based dashboards for doctors and patients, **reducing scheduling conflicts by 30%** through slot-locking logic.
- Secured patient records using parameterized queries and server-side input validation to eliminate SQL injection risks.

Software Repository & Distribution System *PHP, MySQL, Bootstrap* [[GitHub](#)]

- Built a multi-user software distribution platform with version-controlled downloads, optimized for **50+ concurrent users** using SQL indexing and query caching.
- Implemented an access-controlled admin dashboard for file uploads, user management, and audit logging.

EDUCATION

B.Tech — Computer Science & Engineering Expected: **July 2026**
Vishveshwarya Group of Institutions (VGI), Greater Noida, Uttar Pradesh CGPA: **7.1 / 10.0**
Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks

CERTIFICATIONS

• Java (Basic) — HackerRank	2025	[Certificate]
• Problem Solving (Basic) — HackerRank	2025	[Certificate]
• Responsive Web Design — freeCodeCamp	2023	[Certificate]

ACHIEVEMENTS

- 1st Place** — Project Exhibition, Deoria Mahotsav 2020
- 2nd Place** — Scrap Project Competition & **3rd Place** — Technical Project Competition, VGI
